

# Word Search In The Hash Table

the search logic of the project

for example

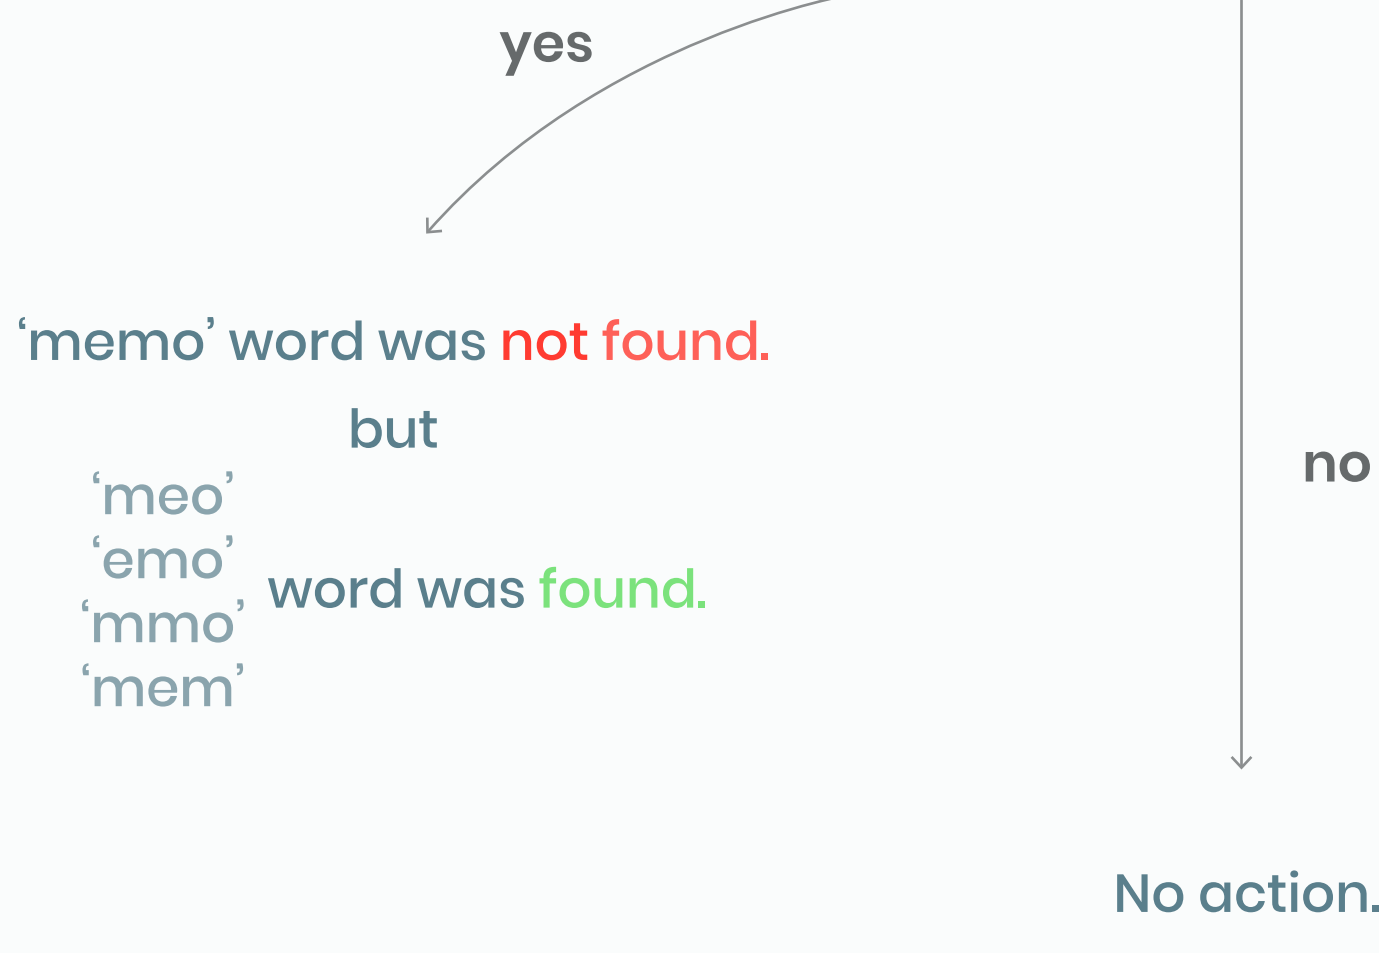

Is there 'memo' word in the text file?

## delete search

~~'memo'~~, ~~'memo'~~, ~~'memo'~~, ~~'memo'~~

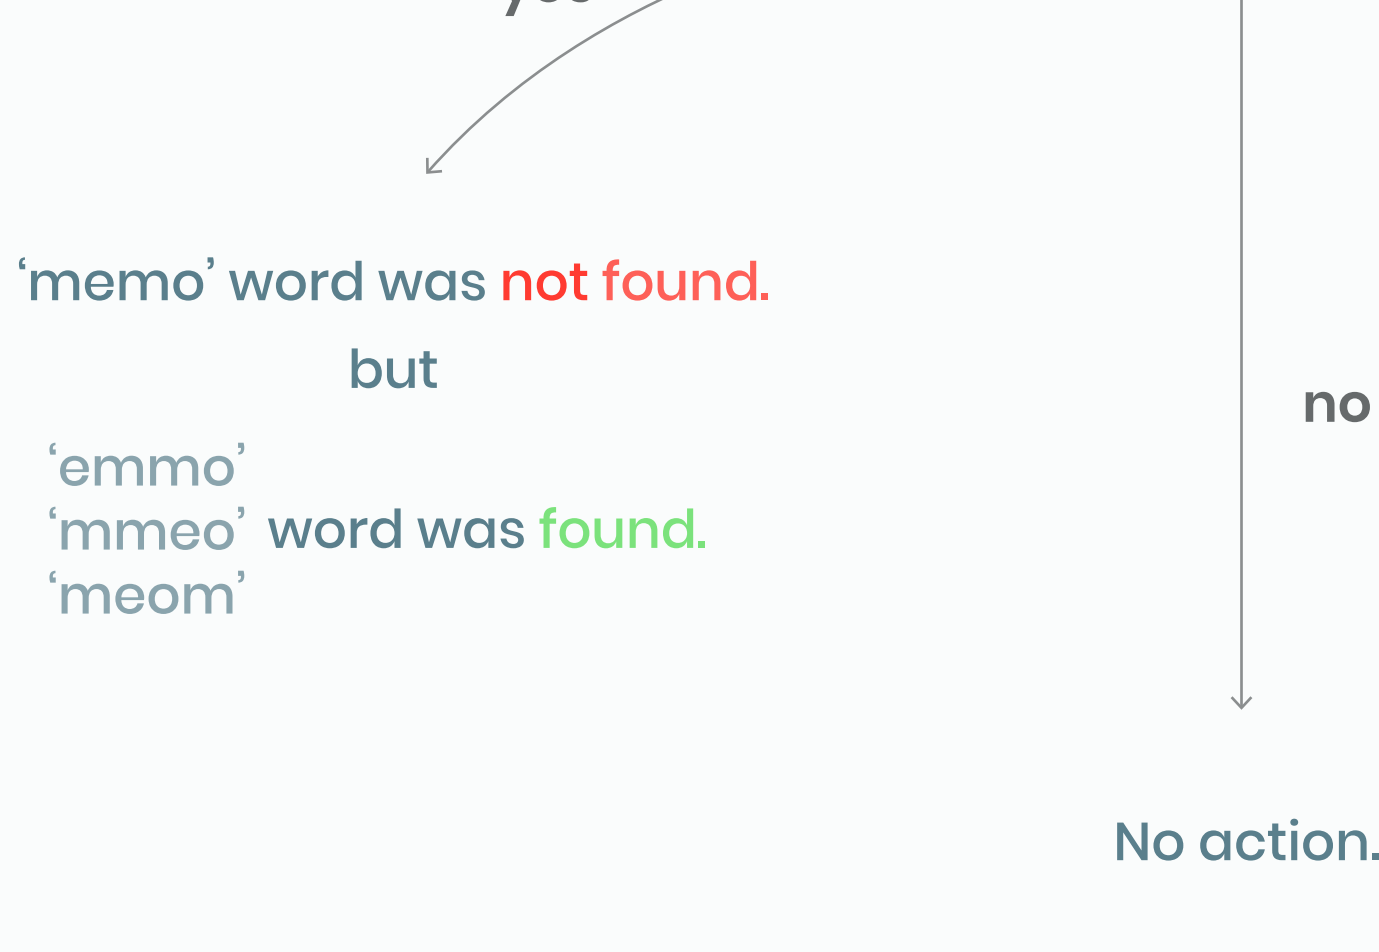

Is there 'meo', 'emo', 'mmo', 'mem' word in the text file? (total serch = 4)

## exchange search

'meemo', 'memmo', 'memmo'

Is there 'emmo', 'mmeo', 'meom' word in the text file? (total serch = 3)

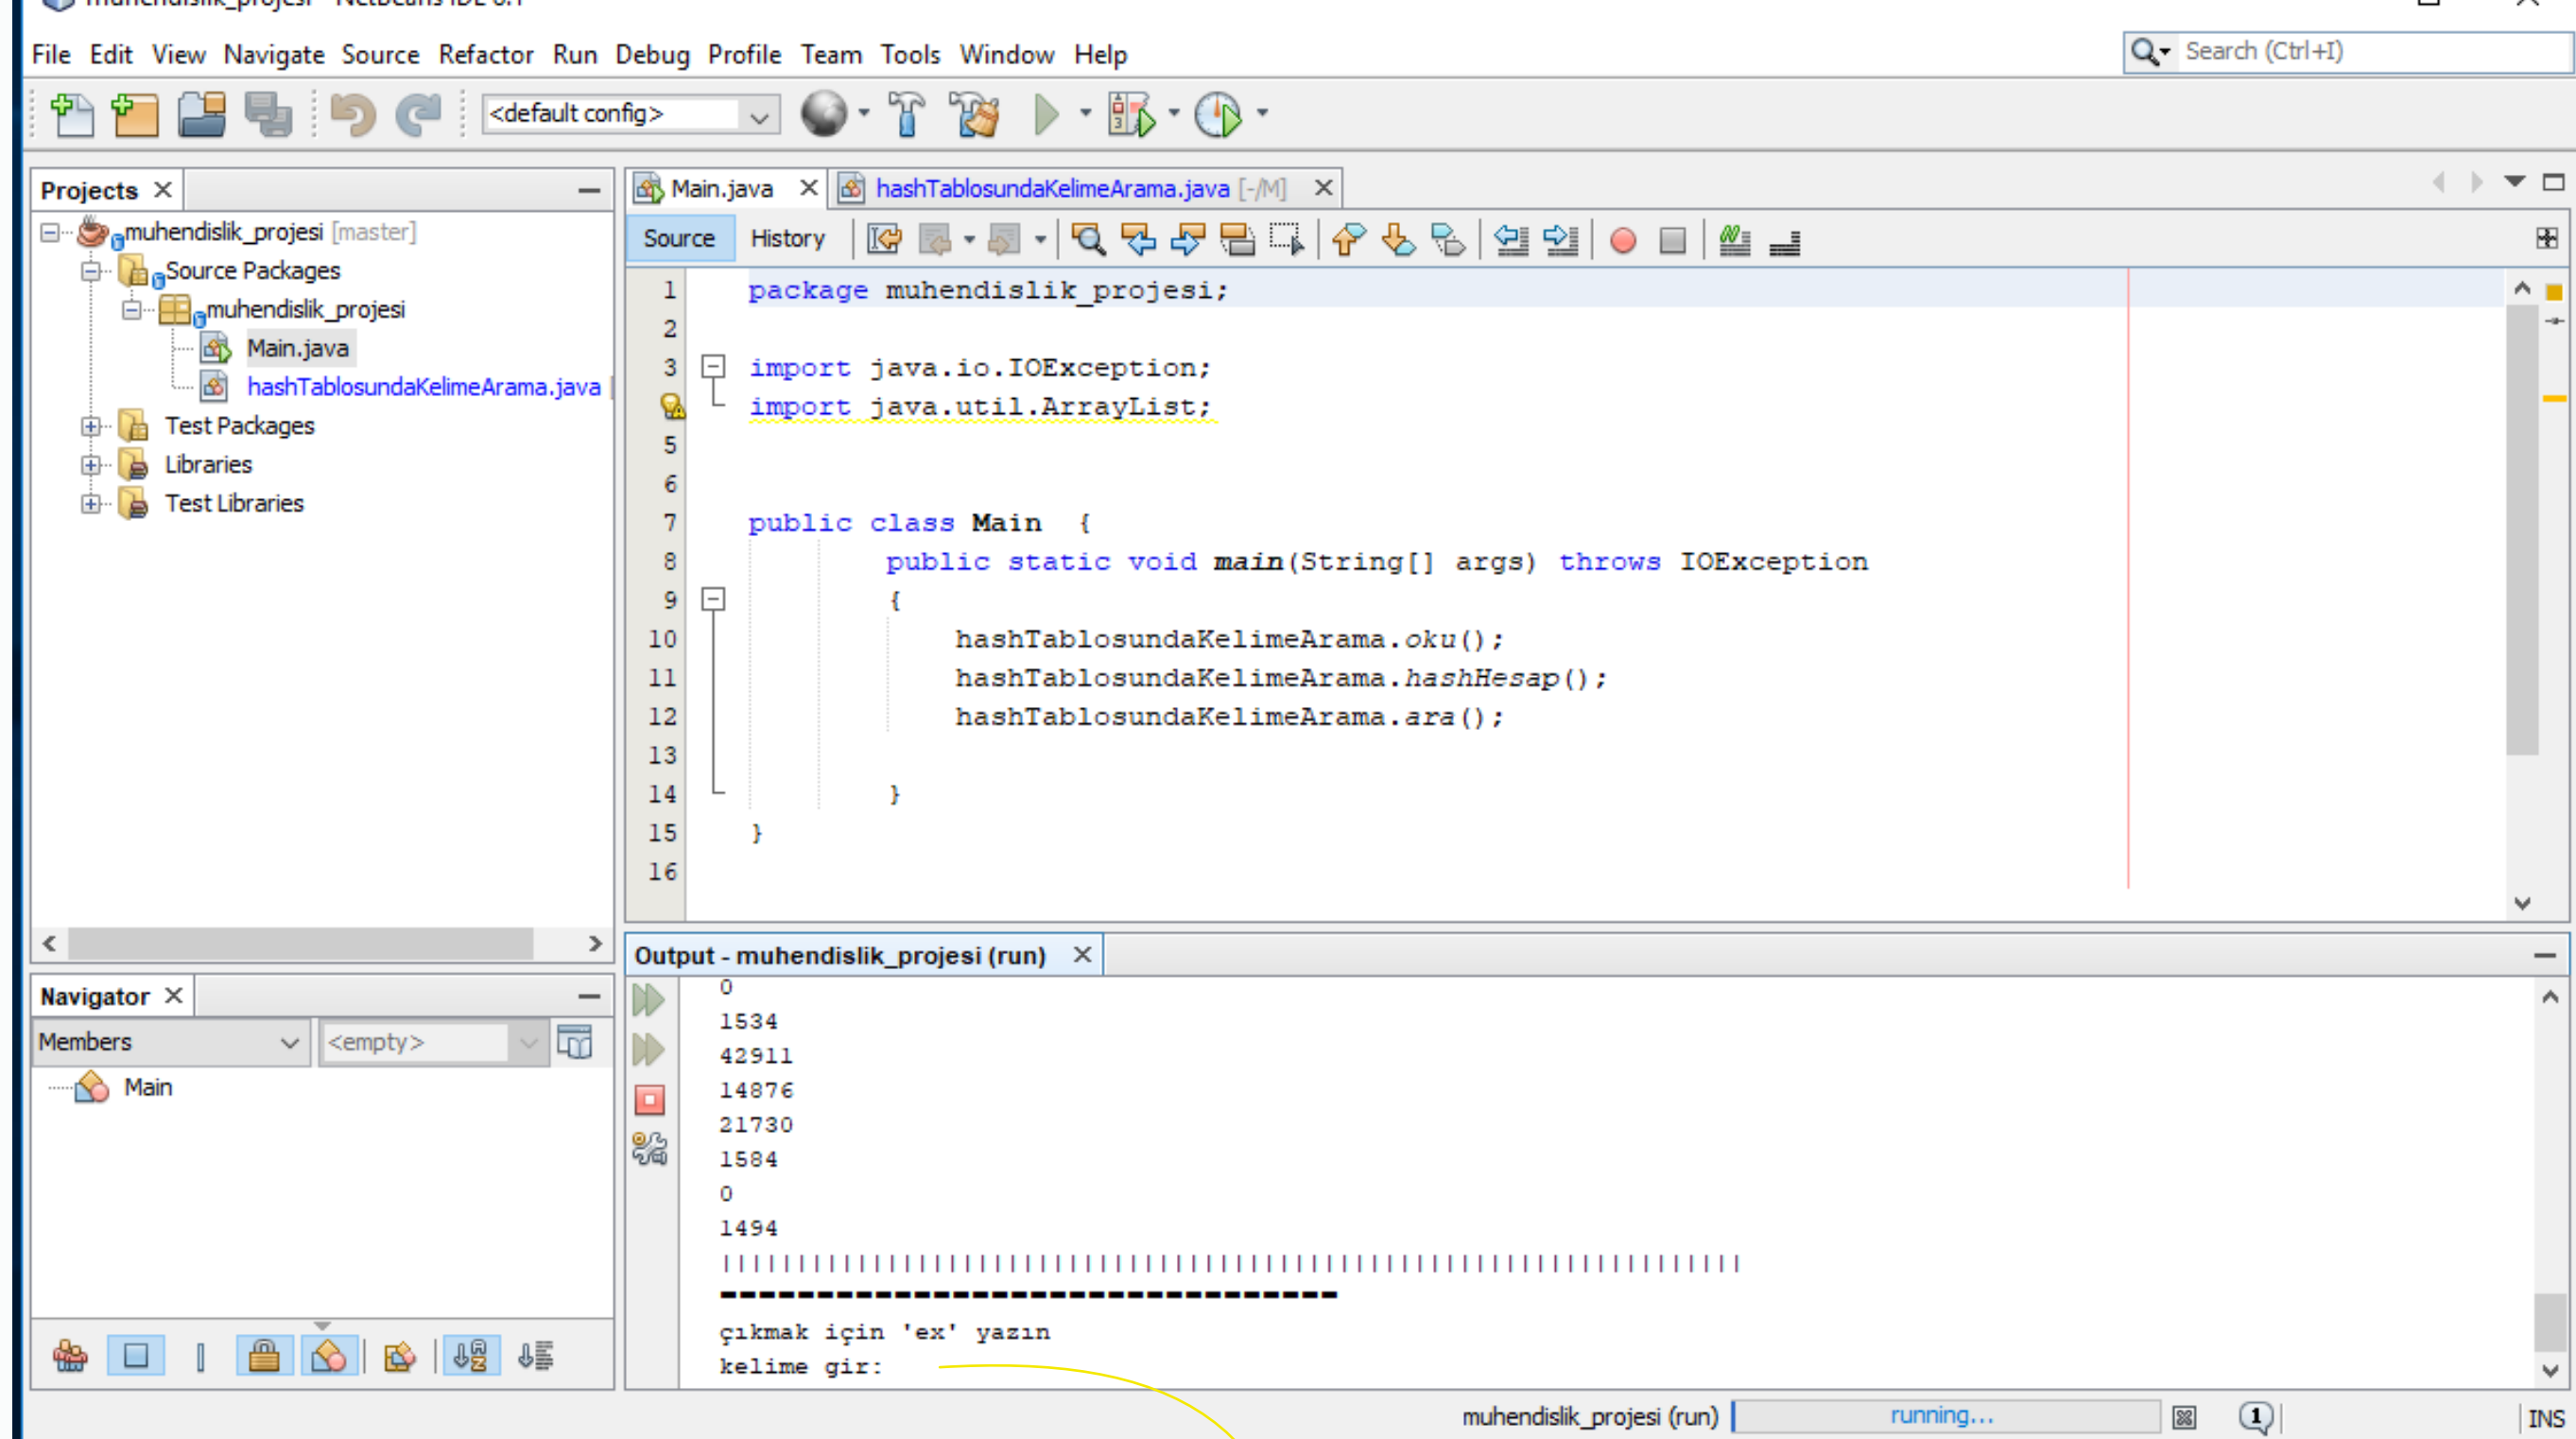

## sample scenario for the project

mem  
emmo  
meom  
is  
ios  
sio  
google  
cumhuriyet  
youtube  
facebook

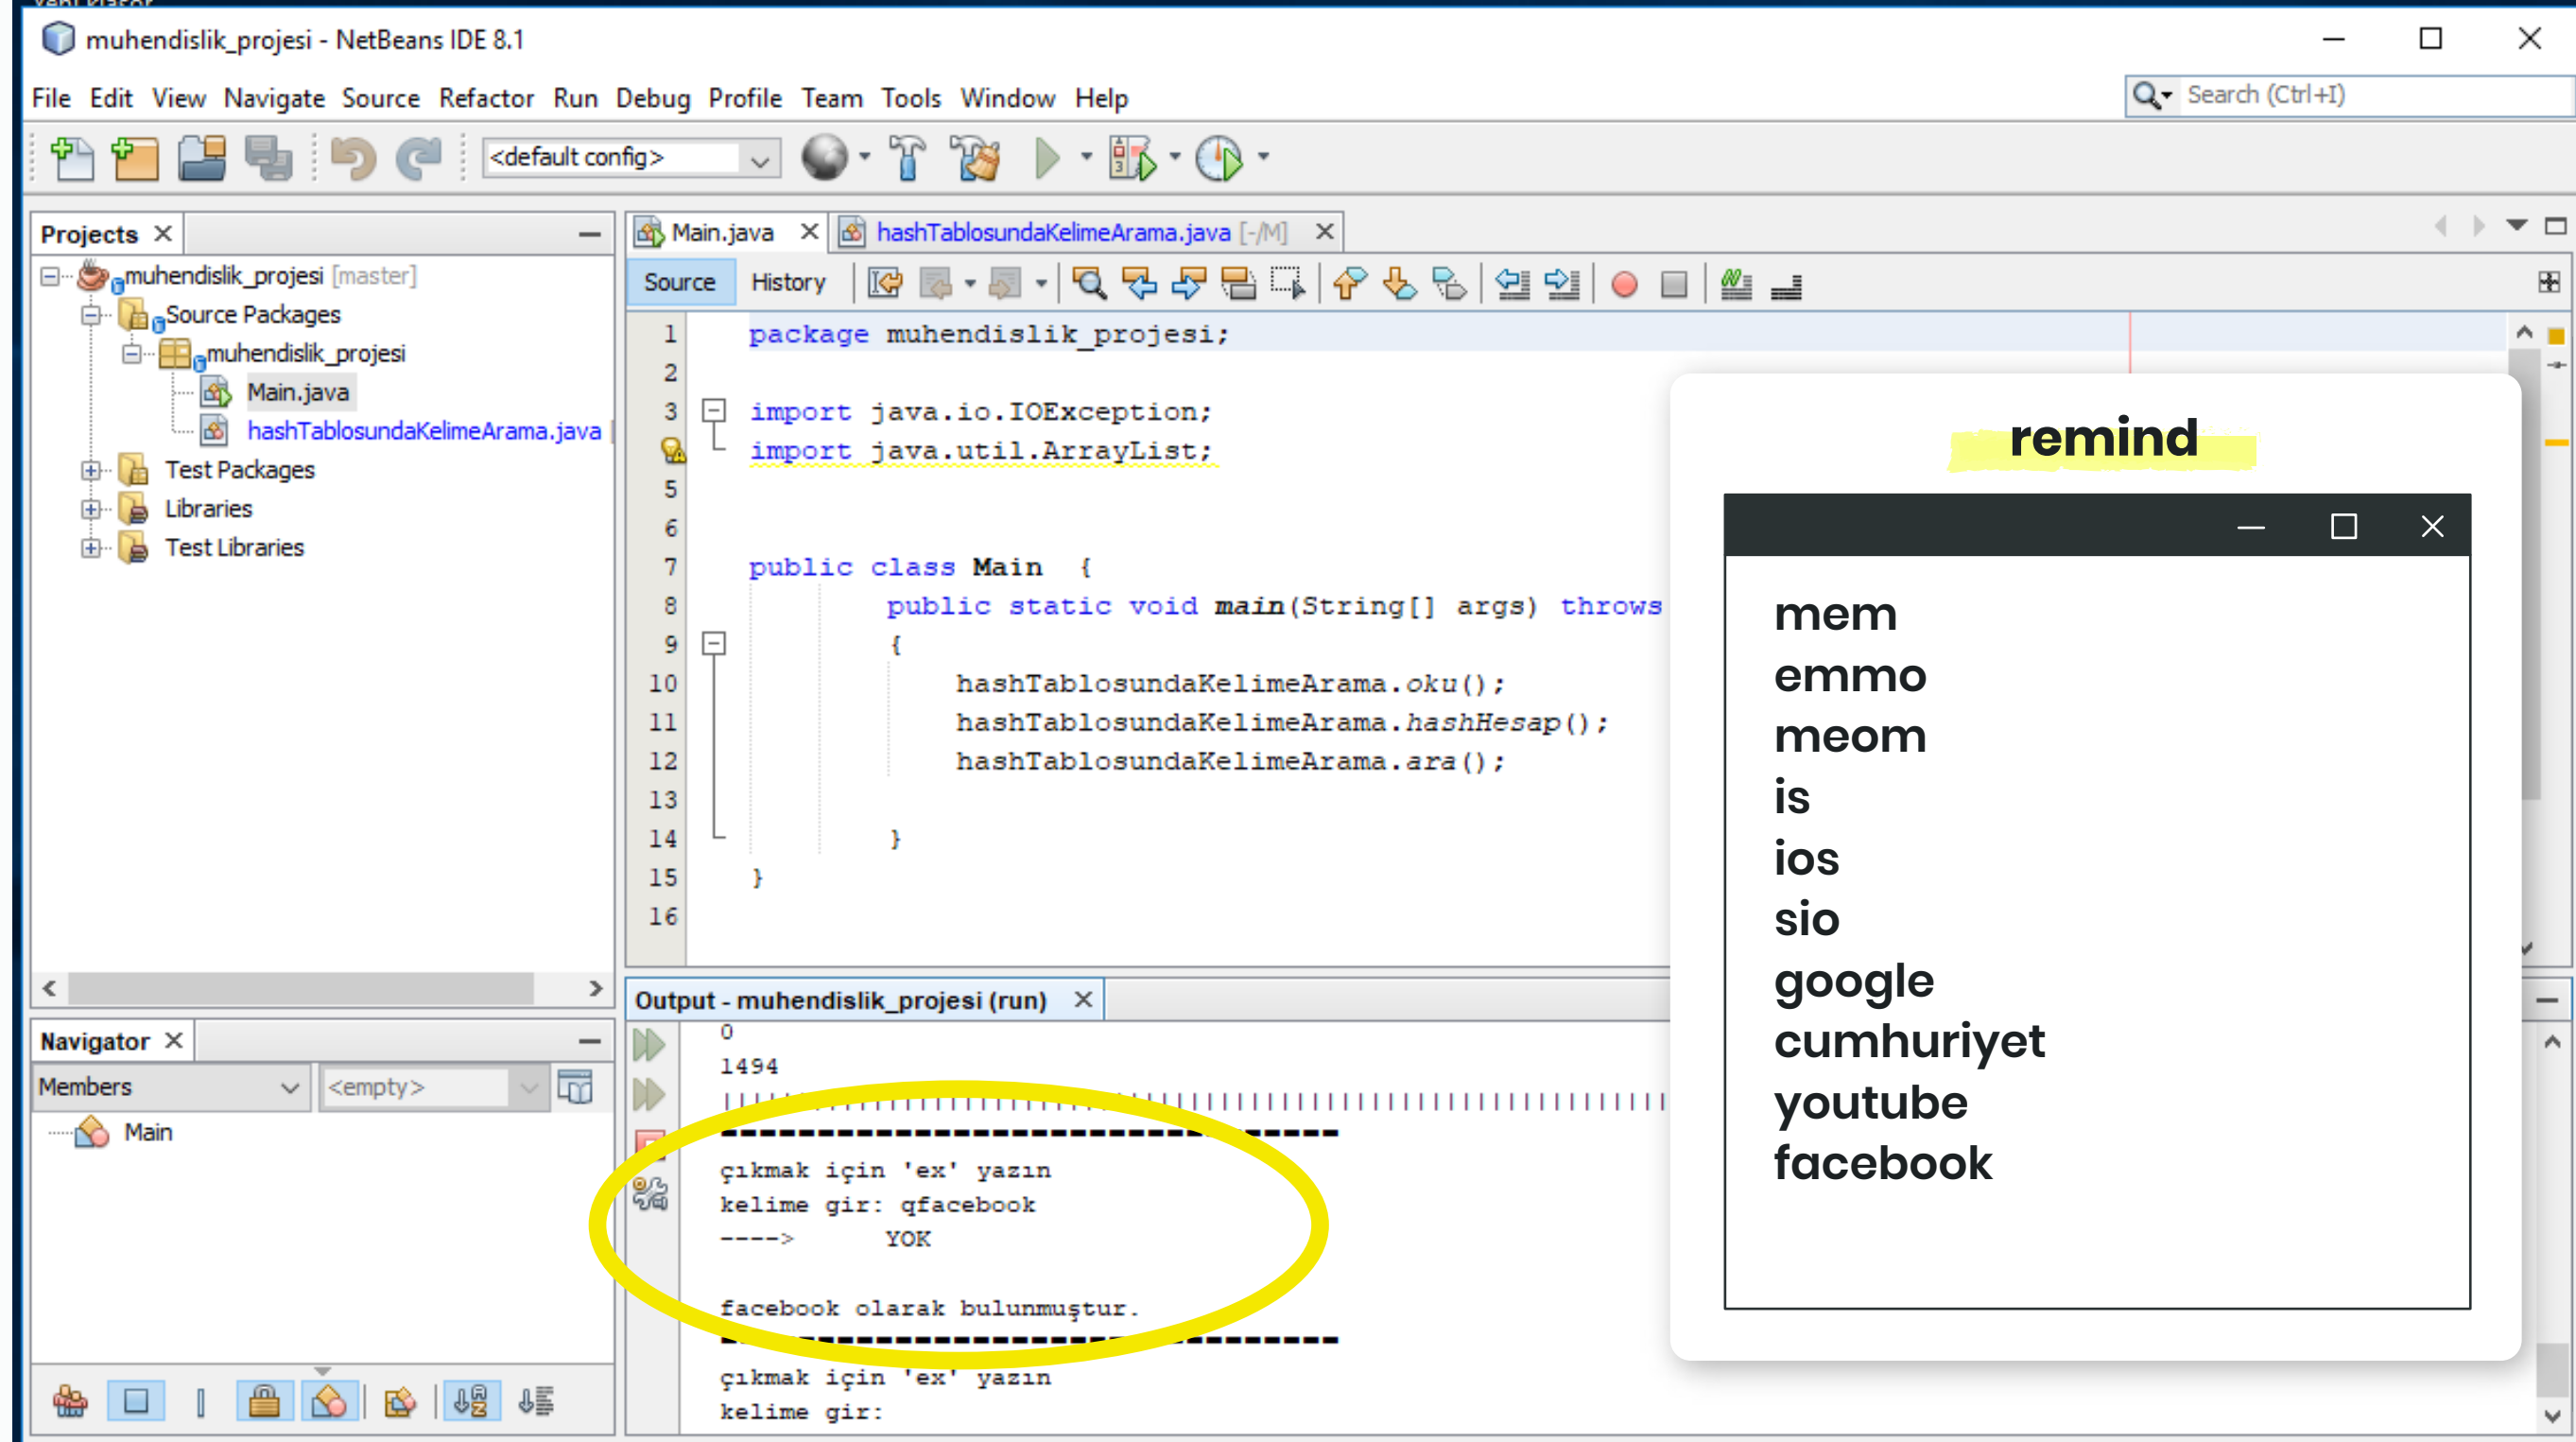

start the project

enter a word to search

'qfacebook'

result

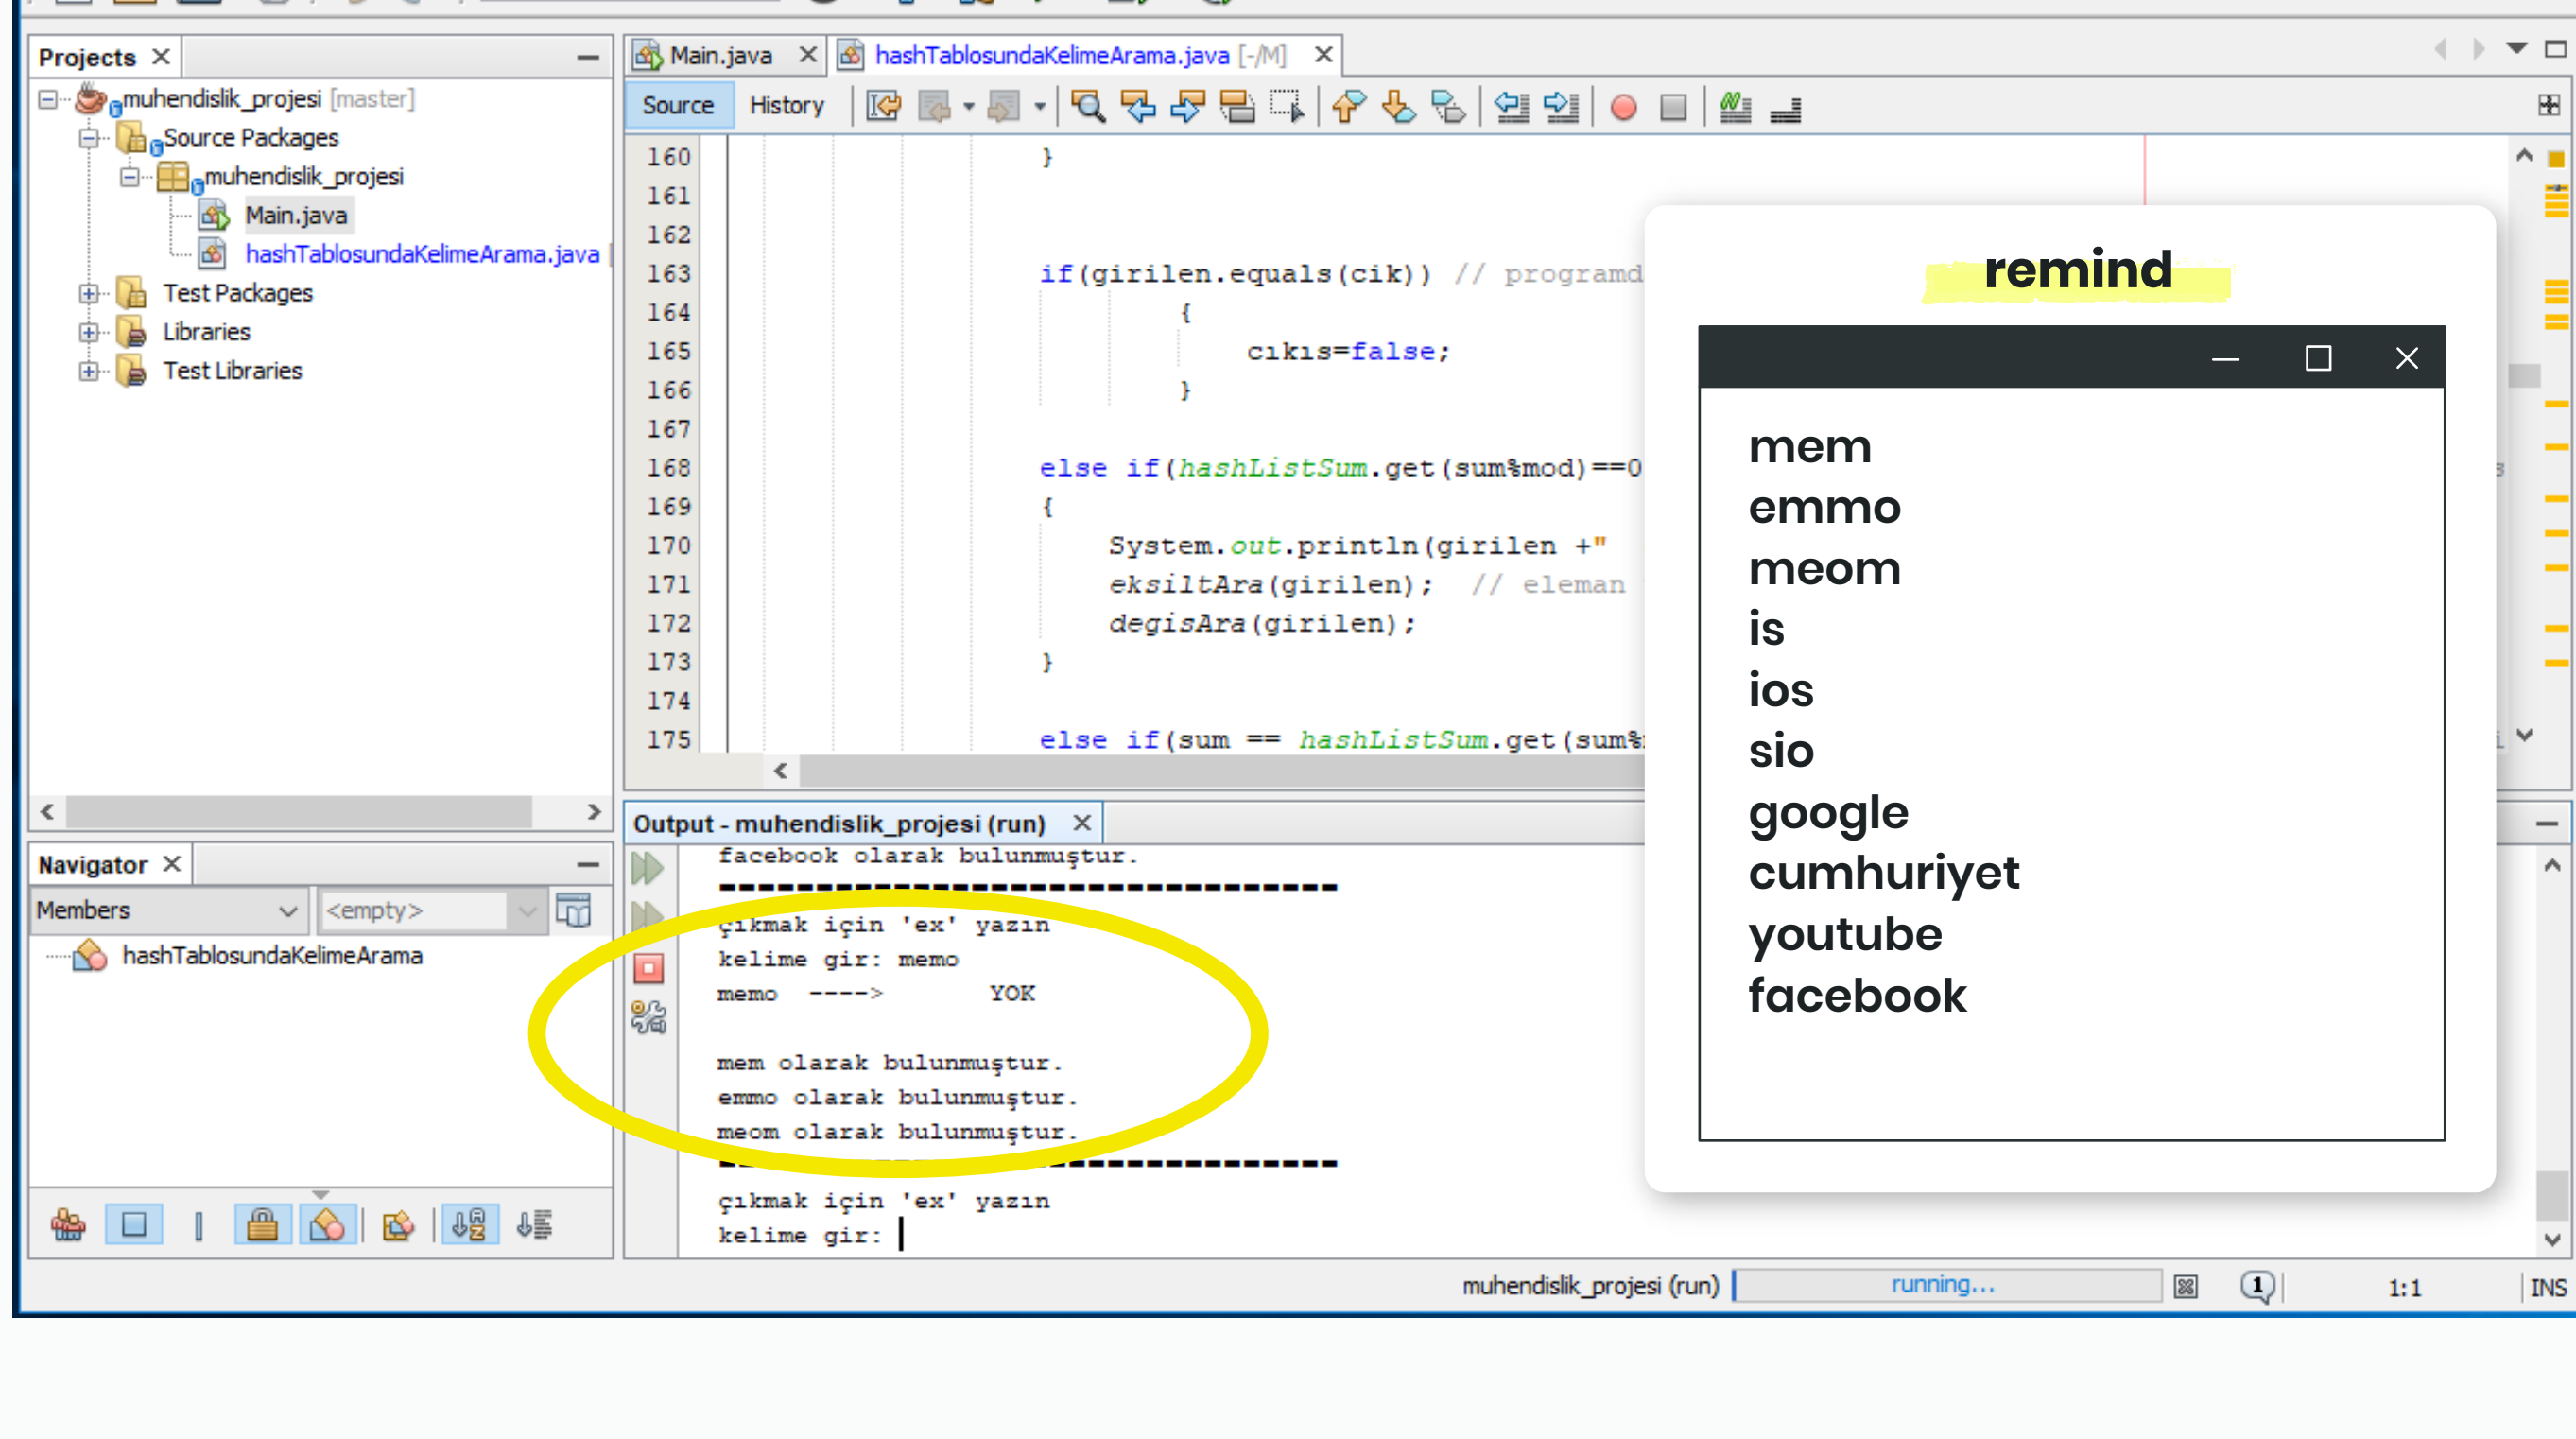

'qfacebook' was not found  
but  
'facebook' was found

example 2

enter a word to search

'memo'

result

'memo' was not found  
but  
'mem', 'emmo', 'meom' was found
